ILONA LANGE
ASPIRING SOFTWARE ENGINEER

OBJECTIVE

To rebrand to Software Engineering. I have a can-do attitude, enjoy working with teams and treat every experience as an opportunity to learn something new.

SKILLS

Python – basic
Linux (Ubuntu/Mint) – basic
Git – basic
HTML – basic
CSS - basic

ABOUT ME

I am very determined to change my career to Software Engineering, and over the last few months I have been working in my free time to achieve my goal.

I'm an aspiring software engineer. I have been teaching myself skills required to become one over the past 3 months. Over the past few weeks I have been learning Python and I did some basic projects, before that I have focused mainly on getting to know Linux and Git. I also did a HTML/CSS/JS bootcamp in the past.

EXPERIENCE HIGHLIGHTS

NEW PRODUCT DEVELOPER • JUDE'S ICE CREAM • MAY 2017 - NOW
After becoming a New Product Development and QA assistant I was promoted to New Product Developer after 6 months of being an assistant, and given more responsibilities.

PRODUCTION ASSISTANT • JUDE'S ICE CREAM • AUG 2016
I started working here after having a few temporary jobs (Picker/Packer, Sandwich Artist). I was quickly promoted to a QA assistant position, and I was directly involved in the development of new products.

ACCOUNT MANAGER • IDEA BANK • 2014
This was my last place of employment in Poland, before I moved to the UK. I was responsible for management of business customer accounts, and identifying potential new clients and business opportunities.
